PROFESSIONAL EXPERIENCE

Mar 2024 - Present

FRONTEND DEVELOPER - HORA GAMES

Working on a range of web projects using React, Astro, Styled Components, and CSS Modules. One notable project was working on a Telegram-based app that allows daily points collection through tasks, friend additions, and a chat feature, built entirely in React.js. Developing a game called OG GO, inspired by Monopoly GO, where players roll dice, earn/lose cash, play mini-games, and progress through cities. The app and the game are fully integrated, allowing users to earn rewards through both gameplay and app activities. App/Game Telegram Link

2024

MUSICSHOP E-COMMERCE PROJECT

Undertakening an e-commerce project utilizing Next.js, TypeScript, Tailwind CSS, MongoDB, and AWS S3. Besides seamless shopping experiences, this project incorporates a comprehensive control dashboard for enhanced management capabilities. Through this self driven project, I have leveraged my skills in building modern web development technologies and in robust e-commerce solutions. Visit musicshop.
